WAR TO DEVELOP MINERALS IN U.S.

Potash and Other Products Will Find Greater Market

Washington, Aug. 21.—"The war offers to the United States the opportunity of freeing itself from any dependence upon foreign countries, not only in the import of foodstuffs, but also of mineral products," declared Secretary of the Interior Franklin K. Lane today.

"What we have not fully realized is that we are nearly as independent in the possession of essential mineral resources as in foodstuffs, and that the interference with manufacturing caused by interruption of the flow of imports of many necessary raw materials may be overcome almost wholly by development of neglected resources in our own country."

"The main difficulties to be overcome are in the rearrangement of the distribution system necessary to establishing this independence."

Potash Deposits in the West.
"We have depended very largely upon the mines of Germany for our supply of potash salts, and war has cut off this supply, but we have large deposits which can be immediately opened and developed if a bill now before congress to make these supplies available is enacted."

"We can draw nitrogen from the air and mix it with lime by the use of large and cheap electrical development, as is done at Niagara Falls and in Norway, and all that is necessary to pave the way to this electrical development is the passage by congress of the Ferris bill now pending, which will make possible the utilization of the great unused water powers of the western states."

"We have some 3,000,000 acres of phosphate lands in the west lying near the smelters from which is produced the sulphuric acid necessary to convert these phosphates into form available for plant food."

St. Worth, Texas, has an auto-bus service between the city and Mt. Olin.

SOME COPPER IS BEING SOLD

Buyers Chary, However, About Making Extended Commitments

The Boston News Bureau states that copper buyers are still chary about making extended commitments but there is some business going forward for August-September delivery at about 12 1/2 cents a pound, electrolytic, delivered 30 days, but round lot orders are scarce.

While no official figures of the exports for copper are given out during war times, it is unofficially stated that not a pound of copper was cleared from Baltimore for export during the past week. The export copper from that port is usually forwarded from the refinery of the American Smelters.

The New York custom house states that 6,492,959 pounds were cleared through their port the past week, which compares with 25,775,169 for the week ending March 21st, this latter being the best export week for the year.

None of this export copper went to Rotterdam, although during the previous week 2,373,989 pounds were shipped. Liverpool took 2,257,659 pounds while shipments to Hamburg amounted to 1,345,931. The London shipments were negligible and amounted to only 280,000 pounds.

During July, considerable of our export shipments went to Russia, which was something unusual as Russia ordinarily is an export nation, and the Russian government has a six cent a pound import duty on copper to protect their Russian mines.

UTAH COPPER MAKES FINE SHOWING FOR THE SECOND QUARTER OF THIS YEAR.

Utah Copper's report for the second quarter of this year makes a remarkably favorable showing. During the three months under review, April, May, and June, the company mined and milled 2,996,157 tons of ore, which is at the rate of 8,990,000 tons annually, and produced 40,917,562 pounds of copper in concentrates, which is at the rate of 160,000,000 pounds a year. The net cost of its copper for the period, after crediting miscellaneous earnings in Utah, including those of its railroad, was only 6.773 cents per pound, being approximately the lowest maintained by any large producer in the world.

The ore handled contained an average of 1.4673 per cent copper and the average milling recovery was 68.44 per cent of this, or 19.95 pounds per ton of ore. Net earnings for the quarter, including the dividend of \$375,187

received on its holdings of Nevada Consolidated stock and other miscellaneous income, were \$2,519,104, or \$1,617,594 in excess of the amount required to pay its quarterly dividend of 75 cents per share, its profits being more than double its dividend requirements. These earnings were arrived at by computation on the basis of 13.910 cents per pound of copper.

At the end of the quarter the company had on hand in transit, sold and unsold, 46,704,098 pounds of copper. Approximately more than 40,000,000 pounds of this was in transit between the smelter and the refinery and in process of electrolytic refining. The amount of unsold ready-for-delivery copper held by the company, therefore must have been very small.

HOUGHTON COPPER CO.

The delinquent sale of all Houghton Copper stock on which the assessments No. 1 and No. 2 had not been paid was indefinitely postponed. This sale was advertised to have been held August 18th. Owing to the condition of the money and stock markets, the management thought best to defer the delinquent sale.

WOMEN CATHOLIC FORESTERS TO ASSEMBLE IN CHICAGO

ELEVEN HUNDRED DELEGATES REPRESENTING 70,000 MEMBERS WILL ATTEND.

Chicago, Ill., Aug. 21.—Eleven hundred delegates, representing 70,000 members of the Woman's Catholic Order of Foresters in thirty-two states, will assemble in Chicago next week for the annual national convention of the order. The convention will open Tuesday morning with a pontifical high mass in the Holy Name Cathedral. The celebrant will be the Right Rev. Alexander J. McGavick, auxiliary bishop of Chicago.

The delegates will be addressed by the Very Rev. Francis X. McCabe, C. M., president of DePaul University. Archbishop Quigley, high court chaplain of the order, will be one of the speakers at the convention, which will begin its sessions Tuesday afternoon in the assembly hall of the Hotel LaSalle. Mrs. Rose D. Rittman of Chicago, is high chief ranger of the order and will preside over the sessions. The deliberations are expected to continue through the week.

Elaborate plans have been perfected for the entertainment of the delegates and visitors. Among the features of the entertainment programme will be an automobile tour of the Chicago park system, an evening boat trip on Lake Michigan, luncheons and dinners, and a reception at the Hotel LaSalle.
